September 6th, 2023

Dear Hiring Manager,

I am writing to express my strong interest in the Associate Software Development Engineer position within the NERD program at Charles Schwab. The opportunity to work on the next generation of Schwab technology capabilities is both exciting and aligns perfectly with my career aspirations and skill set.

I am drawn to Schwab's commitment to empowering clients to own their financial future, and I am eager to contribute my expertise to this mission. With a background in software development and a passion for innovation, I am confident in my ability to make meaningful contributions to your team.

The prospect of being involved in the entire Software Development Lifecycle, from evaluating feature requests to coding, testing, and deployment, greatly appeals to me. I believe that a holistic understanding of the development process is crucial for creating solutions that truly address the needs of clients and end-users. My experience refactoring and debugging my current company's software and developing personal projects has honed my skills in front-end, back-end, and full-stack development. I am excited to apply these skills at Schwab!

Working alongside a team of talented professionals to plan and develop cutting-edge technology solutions is a prospect that energizes me. I thrive in environments that encourage innovation, teamwork, and continuous learning, and I believe Schwab embodies these principles.

In addition to my technical skills, I bring strong communication and problem-solving abilities to the table. These skills have proven invaluable in my past roles, where I have successfully collaborated with cross-functional teams and delivered solutions that exceed expectations.

I would welcome the opportunity to discuss in more detail how my background and experiences align with the requirements of the NERD program at Charles Schwab. Thank you for considering my application. I have attached my resume for your review and am excited about the possibility of contributing to Schwab's future success!

Sincerely,

Matthew Kellner
